Renewable Natural Gas (“RNG”) Preliminary Request Form & Information Sheet

UGI Utilities, Inc. (“UGI”) offers RNG project developers the opportunity to connect to its natural gas distribution system as a natural gas supply source provided certain conditions are met. These conditions are outlined in UGI’s Tariff and further specified in a project-specific Coordination Agreement.

The below illustrates the high-level flow from project conceptualization to achieving commercial operations:

To initiate UGI’s review process, UGI requests you, or a qualified representative on your behalf, complete this form and return it to your UGI point of contact. Doing so will initiate UGI’s review of the “Takeaway Capacity Confirmation” step noted above.

Please note that if you’re considering multiple RNG injection locations, it is required that you submit one form for each. Additionally, if you are considering a range of flow rates, it is required that you list the highest potential flow rate but call out, in the notes section, your anticipated ramp up period by year.

UGI operates a dynamic hydraulic system. Any feedback provided as a result of this review is as of the time of the analysis. UGI makes no representations or warranties as to the available capacity on its system in the future, RNG market size and availability, or the marketability of such gas products. If you are interested in selling RNG to UGI, please indicate such by checking the appropriate box in this preliminary request form.

Please complete this form in its entirety to ensure an efficient preliminary review of your request. Email completed form to your UGI Relationship Manager: www.ugi.com/relationshipmanager.

Thank you and we look forward to working with you through this process!

RNG Project Developer Information

Company Name:

Mailing Address:

City:

State:

Zip:

Phone:

RNG Physical Site Information

Site Address:

City:

State:

Zip:

RNG Project Developer is currently operating other facilities in the United States: Yes No

RNG Project Developer is currently operating other facilities in Pennsylvania: Yes No

If yes, please list other facility locations (name, address) in the space below:

RNG Injection Information

RNG Source: Landfill Digester Other:

RNG Injection Flow Rate: cubic ft. per hour

Anticipated COD or Initial RNG Injection Date:

RNG Monetization Information (Optional)

Gas Rights are owned by the RNG Project Developer listed above: Yes No

Some (or all) buyers for the RNG to be produced by this project have already been identified: Yes No

RNG Project Developer is interested in discussing RNG supply purchase options with UGI's Gas Supply Team: Yes No

Other Notes and Considerations:

Authorized Signatory
